

2013 REPORTS

12/1 another season has come to a close ,it was definely a busy year we started off on May 2 with 2 keeper bass jigged at Eatons Neck, successive trips saw 3 to 4 keepers Then it petered out. Stripers showed off Cranes on May 7 but it was hit or miss thereafter ,May 16 marked the start off a solid fluke run for 3 weeks off Bouy 9 with limits to 6lbs the norm even though we didn't have the huge schools of Sandeels early as in previous years .On .may 23 huge porgies were camped out at Cranes but disappeared after a Northerly blow .Porgie action was building to the east now .Bass action was hit or miss until June 6 when large schools of Peanut Bunker moved in , this plus new moon gave us solid fishing with june 8th trip catching 13 keepers to 20 lbs.june 10th marked the arrival of the Big Stripers with bunker in the area.Drifting bunker and EELs was now the choice method .june 21 saw the arrival of big bass at the middle grounds with 9 keepers that day and the start of a 12 day bass marathon fishing the full moon with bass to 32.5 lbs and 30 bass over 36 inches.As the full moon currents tapered off and the inshore warmed up chunking was way to go with trips of 11 and 14 keeper bass to 27 lbs.The Bass were camped out on mussel beds for 3 weeks chowing down newly arrived porgies.The porgie bite was also awesome with limits of jumboPorgies.By August1 the Bass bite slowed dramatically the Porgie bite was savage every day with nice 3-4 lb seabass mixing in.cocktail blues made there appearance sporadically,But big Blues were scarce.By labor day weekend weakfish showing on the inshore rockpiles taking clam baits this fishing well into October.On October 5 blackfish season opened there were fish around but warm water temps slowed fishing by end of month after a nw blow Blackfish kicked into high gear during Halloween week saw best catches this fall.WE had around 360 blackfish this year with around 90 making the 16 inch mark or about 25 percent keeper ratio.A few cold days in Mid November dropped water temps 5 degrees in just few days sending Bluefish running to warmer water and upended the Blackfish season.Keepers were harder to come by even in deeper water.Our final trip on Nov 29 had 48 degree water Keeper Stripers feeding on heering were around but keeper Blacks were hard to come by for everyone .We topped off our Keeper Striper tally at 302 with about another 120 shorts,Bluefish came in around 450 to 15lbs,Porgies top the list with 1300 caught Best ever of the 48 years I have fished the Sound
